

I am student at Bentley University majoring in Data Analytics and minoring in Finance and General Business Studies. Using my analytical, mathematical and problem-solving skills I am working towards a career in data analysis. I am prepared to add value to any organization through quantitative decision-making from both structured and unstructured data. Through a combination of mathematics, statistics and computing courses—including hands-on project work with R, Python and SQL—I not only understand key concepts and techniques, but also know how to apply them and communicate results to the modern business world. I find myself most effective when working in a collaborative, team-based environment; and I believe that strong communication skills are critical for any effective team-member.

Skills:

- Python
- SQL
- Excel
- Database Management
- Research and Critical Thinking
- R
- Data Analysis
- Statistics
- Financial Analysis
- Written and Oral Communication

Education:

- **Bentley University – Waltham, MA** **September 2017 – August 2021**
Candidate for Bachelor of Science, Data Analytics, Minor in Finance and General Business Studies
